Simple Troubleshooting Guide 30

Notes on installation

English

- The unit is designed for **12V DC**, negative ground operation system only. Before installing the unit, make sure your vehicle is connected to **DC 12V** negative ground electrical system.
- The negative battery terminal must be disconnected before making connections, which can reduce damaging the unit due to short circuit.
- Be sure to connect the color coded leads correctly according to the diagram. Incorrect connections may cause the unit malfunction or damage the vehicle's electrical system.
- Be sure to connect the speaker (-) leads to the speaker (-) terminal. Never connect the left and right channel speaker cables each other or to the vehicle body.
- Do not block vents or radiator panels. Blocking them will cause heat to build up inside and may result in fire.
- After the completion of the installation and begin to play the unit(including replacing the battery),please press the **RESET** button on the front panel with pointed objects (such as ball-point pen)to set the unit to initial status.
